PROFESSIONAL SUMMARY

Founded the DevOps practice at GTBank Ghana and the engineering function at MyHealthCop. Now run the on-prem Kubernetes platform behind 1.5M+ daily core banking transactions on 800+ pods at 99.97% uptime, across AWS, GCP, Azure, and OCI. Built the cloud transformation that took GTBank from manual deployments to K8s with GitOps and IaC, cutting deployment time by 90% and increasing release velocity 5x. Comfortable bridging strategy, team building, and hands-on execution because I have done all three.

CORE COMPETENCIES

Cloud and platform strategy

Cloud transformation programs

SRE and DevOps team leadership

Cloud governance, security, operations

Multi-cloud (AWS, GCP, Azure, OCI)

Vendor and cost management

Cross-functional leadership

Infrastructure automation and AI agents

PROFESSIONAL EXPERIENCE

Guaranty Trust Bank Ghana LTD Apr 2024 - Present

DevOps Engineering Lead

Accra, Ghana

- Founded the bank's DevOps team of 4 engineers from zero. Designed individual ramp-up paths and brought all 4 to on-call competence within 90 days. Team now runs 800+ production pods on TKG.
- Architected high-availability Kubernetes clusters across multiple on-prem environments running internal applications handling 3M+ daily requests with 99.97% measured uptime.
- Drove the bank's cloud transformation: replaced manual code handoffs with enforced Git workflows, containerised K8s deployments, and automated release pipelines. Cut deployment time by 90% and increased release velocity 5x.
- Introduced GitOps with FluxCD for consistent, repeatable deployments and rapid disaster recovery rebuilds. Integrated Veracode and Trivy for automated security scanning.
- Introduced a unified observability stack (Prometheus, Grafana, Elastic Stack, Sentry) for centralised logging, tracing, and real-time alerting.
- Manage multi-cloud infrastructure across Azure and AWS: resource provisioning, private VPC links to on-prem systems, deployments, access control, and cost optimisation.

Guaranty Trust Bank Ghana LTD May 2025 - Present

Core Banking Services Lead

Accra, Ghana

- Own the on-prem Finacle core banking deployment on Tanzu Kubernetes Grid: deployments, patching, and incident response across 800+ production pods sustaining 1.5M+ daily transactions.
- Architect integrations between Finacle core banking and third-party systems including transaction portals and internal tools.
- Extended the bank's observability stack into core banking with Finacle-specific dashboards plus threshold-based alerting that drives proactive scaling.
- Lead L2 support, correlating logs across internal apps and core banking microservices via the Elastic Stack for root cause analysis.

Chief Technical Officer (Founding)

Accra, Ghana

- Architected the myhealthcop.com platform end to end across requirements gathering, system design, database modelling, and API development. Delivered three apps: a patient Flutter app, a Flutter app for health professionals, and a React admin web dashboard.
- Led a 12-person cross-functional team (frontend, backend, mobile, product, design, QA) through full project lifecycle: requirements gathering, sprint planning, stakeholder management, and budgeting under Agile/Scrum.
- Designed secure, cost-efficient AWS infrastructure running containerised microservices on EKS and ECS alongside Lambda functions for event-driven workloads, with autoscaling, load balancing, and inter-service communication.
- Designed a disaster recovery strategy mirroring the AWS production environment on GCP using GKE, Cloud SQL, and Cloud Storage, with secure VPCs, IAM policies, and dual-environment CI/CD for rapid failover.
- Built a high-throughput background processing system handling 1M+ daily jobs across payments, messaging, and notifications using SQS and SNS, with multi-provider failover.

PROJECTS

Virk Cloud - Platform-as-a-Service Founder and CTO · Aug 2025 - Present

Architected a PaaS for startups with built-in CI/CD, observability, and log streaming. Built a management console for workload management, custom domains, and monitoring dashboards. Manage underlying RKE2 Kubernetes infrastructure on private VPS including cluster deployment, hardware, and network provisioning.

Stack: Next.js, Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana

AI Agents for Infrastructure Operations Personal R&D · 2024 - Present

Building specialised AI agents for QA automation, code review, and sysadmin operations, running against live Linux production servers with real workloads. Prototyping agent-driven SaaS tools using RAG, tool-use, and multi-agent orchestration patterns.

Stack: Claude API, Python, Linux, AWS Lambda, EventBridge, DynamoDB

Digital-Recon - Transaction Reconciliation Engine Founder · 2025 - Present

Real-time transaction reconciliation engine for financial institutions. Detects discrepancies across heterogeneous data sources (relational DBs, APIs, Elasticsearch) using Kafka for ingestion and Celery for scheduled and on-demand reconciliation jobs.

Stack: React, TypeScript, Python, Celery, Kafka, Elasticsearch, PostgreSQL

EDUCATION

BSc Computer Engineering · Ashesi University

Sep 2016 - May 2020

Berekuso, Ghana

PROFESSIONAL CERTIFICATIONS

Oracle Certified Architect Associate · Oracle	Aug 2025
Oracle Certified DevOps Professional · Oracle	Aug 2025
AWS Certified Cloud Practitioner · AWS	May 2024
AI Engineering Specialization · ByteByteAI	Mar 2026

TECHNICAL SKILLS

Cloud and Infrastructure: AWS (EKS, ECS, Lambda, S3, SQS/SNS, EventBridge, DynamoDB, VPC), GCP (GKE, Cloud SQL, Cloud Storage), Azure, OCI, on-prem bare metal (Tier III data centres)

Containers and Orchestration: Kubernetes (EKS, GKE, TKG, RKE2), Docker, Helm, Istio

Platform Engineering: GitOps (FluxCD, ArgoCD), internal developer platforms, PaaS architecture, multi-tenant infrastructure

CI/CD and IaC: Terraform, Ansible, GitHub Actions, FluxCD, ArgoCD, Azure DevOps, Codemagic, Jenkins

Observability and Security: Prometheus, Grafana, ELK Stack, Sentry, OAuth2, OIDC, Keycloak, JWT, LDAP, Veracode, Trivy

Languages: Python (Django, FastAPI, Celery), TypeScript, JavaScript, Node.js, Bash

Architecture: Microservices, event-driven, serverless, multi-region disaster recovery
