

Oswald Gyabaah

oswald.gyabaah@gmail.com · linkedin.com/in/ogyabaah · github.com/cyteger · Accra, Ghana

PROFESSIONAL SUMMARY

Former CTO and Senior DevOps Engineer with 6 years operating production Kubernetes infrastructure on AWS, GCP and on-prem Tanzu Kubernetes Grid and RKE2 clusters. Founded GTBank's DevOps practice and now own its core banking cluster, sustaining 1.5M+ daily transactions at 99.97% uptime.

CERTIFICATIONS

AWS Certified Cloud Practitioner · AWS · May 2024

Oracle Certified DevOps Professional · Oracle · Aug 2025

Oracle Certified Architect Associate · Oracle · Aug 2025

AI Engineering Specialization · ByteByteAI · Mar 2026

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EKS, ECS, S3, VPC, IAM), Azure, GCP (GKE, Cloud SQL), OCI, VMware,

Container Orchestration: Docker, Docker Compose, Kubernetes (EKS, GKE, TKG/Tanzu, RKE2, AKS), Helm

IaC & GitOps: Terraform, Ansible, FluxCD, ArgoCD, GitHub Actions, Azure DevOps, Jenkins, Codemagic

Observability: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana, Filebeat), Sentry

AI & Agents: LLM API integration (Claude, OpenAI), RAG systems, AI agent development

PROFESSIONAL EXPERIENCE

DevOps Engineering Lead · *Guaranty Trust Bank Ghana LTD* · Accra, Ghana May 2025 - Present

- Founded the bank's DevOps team of 4 engineers, replacing manual code handoffs with enforced Git workflows, containerized Kubernetes deployments, and automated release pipelines.
- Implemented CI/CD automation that cut deployment time by ~90% and increased release velocity ~5x; introduced GitOps with FluxCD for consistent, repeatable deployments across multiple clusters; integrated Veracode and Trivy scanning for automated security analysis.
- Architected high-availability Kubernetes clusters across multiple on-prem environments running internal applications handling 3M+ daily requests, with 99.97% measured uptime including scheduled maintenance.
- Managed multi-cloud infrastructure across AWS and Azure: resource provisioning, private VPC peering to on-prem systems, IAM, access control, and cost optimization.
- Automated 95% of infrastructure configuration management using Terraform, Ansible, Python, and Bash, turning multi-day manual processes into reproducible, version-controlled deployments.
- Introduced a unified observability stack (Prometheus, Grafana, Elastic Stack, Sentry) for centralized logging, tracing, and real-time alerting, reducing mean time to resolution on production incidents.

Core Banking Services Lead · *Guaranty Trust Bank Ghana LTD* · *Accra, Ghana* May 2025 - Present

- Own the on-prem Finacle core banking deployment on Tanzu Kubernetes Grid, managing deployments, patching, and incident response across 800+ production pods to sustain 1.5M+ daily transactions.
- Extended the bank's observability stack into core banking with dashboards for CPU/memory trends, transaction volumes, response times, and exceptions, plus threshold-based alerting.
- Led L2 incident response, correlating logs across internal apps and core banking microservices via the Elastic Stack for root-cause analysis and remediation.
- Led a 5-person QA team through the bank's Basis-to-Finacle migration cutover, designing and executing 10,000+ test cases across 13 core banking modules and 33 internal applications over a two-week window.
- Architected integrations between Finacle core banking and third-party systems including transaction portals and internal tools.

Chief Technical Officer (Founding) · *MYHEALTHCOP LTD* · *Accra, Ghana* Jan 2021 - Mar 2024

- Designed secure, cost-efficient AWS infrastructure running containerized microservices on EKS and ECS with autoscaling, load balancing, and inter-service communication.
- Automated application delivery and infrastructure provisioning via CI/CD pipelines on GitHub Actions and Terraform, making deployments repeatable, auditable, and reversible.
- Designed a disaster recovery strategy mirroring the AWS production environment on GCP using GKE, Cloud SQL, and Cloud Storage, with secure VPCs, IAM policies, and dual-environment CI/CD for rapid failover.
- Built a high-throughput background processing system handling 1M+ daily jobs across payments, messaging, and notifications using SQS/SNS, with multi-provider failover.
- Led DB optimizations that reduced peak latency by 90% through caching, batching, and indexing.
- Led a 12-person team across the full Agile lifecycle from sprint planning to stakeholder management

PROJECTS

Virk Cloud (virk.cloud) · *Founder & CTO* Aug 2025 - Present

- Architected a Platform-as-a-Service for startups with built-in CI/CD, observability and log streaming
- Built a management console for workload management, custom domains and monitoring dashboards
- Manage underlying infra on private VPS including cluster deployment, hardware and network provisioning

Digital-Recon: Transaction Reconciliation Engine · *Founder* 2025 - Present

- Building a real-time transaction reconciliation engine for financial institutions to detect discrepancies across heterogeneous data sources including relational DBs, APIs, Elasticsearch, etc in realtime.
- Architected an event-driven processing layer using Kafka for upstream transaction ingestion and Celery for scheduled and on-demand reconciliation jobs.

EDUCATION

BSc Computer Engineering · *Ashesi University* · *Berekuso, Ghana* Sep 2016 - May 2020
