PROFESSIONAL SUMMARY

Full-stack engineer with 6 years shipping React/Next.js frontends, Python/Node backends, and production AI agent systems end-to-end. Built **Palsar** (AI web-monitoring SaaS on Next.js 14 + Convex + Claude API) and **Root-ID** (AI agent identity and messaging platform). Founding CTO of MyHealthCop where I led a 12-person cross-functional team delivering a React patient portal, Flutter mobile apps, and admin dashboard on AWS/GCP. Founded GTBank Ghana's DevOps practice from zero - CI/CD automation cut deployment time ~90% and release velocity increased ~5x. Currently applying AI-assisted development to feature work, QA automation, and infrastructure tooling.

CORE COMPETENCIES

JS Fullstack (React, Next.js, Node.js)

AI-Assisted Development (Claude API, RAG, Agents)

Component Architecture & State Management

Python / FastAPI / Django Backends

CI/CD Pipelines & Deployment

Cloud Infrastructure (AWS, GCP, Kubernetes)

Database Architecture (PostgreSQL, Redis, Convex)

Client-facing Consulting & Coaching

WORK EXPERIENCE

Guaranty Trust Bank Ghana LTD May 2025 - Present

Manager, Finacle Services Team

- Built a bank-wide **second-factor verification service (OTP)**: Next.js frontend + Django API + SMS/email gateways, logging to Elasticsearch via Filebeat - securing core banking logins for 600+ internal users.
- Built a **Ghana Card verification tool** (Next.js + Python/Celery + Redis): processes national ID verification, stores documents in self-hosted MinIO, and updates customer records with verified images.
- Architected multi-system integration between Finacle core banking and third-party applications: transaction portals, internal tools, peripheral services.
- Led end-to-end QA for the bank's migration from Basis to Finacle: planned and executed 10,000+ test cases across 13 core banking modules and 33 internal applications.
- Manage 800+ production pods across Tanzu Kubernetes Grid, sustaining 1.5M+ daily banking transactions.

Guaranty Trust Bank Ghana LTD Apr 2024 - May 2025

DevOps Engineering Lead

- Founded the bank's **DevOps team of 4 engineers**, establishing CI/CD, GitOps with FluxCD, and containerized deployments across internal apps.
- Implemented CI/CD automation that **cut deployment time by ~90%** and increased release velocity ~5x; integrated Veracode and Trivy scanning.
- Architected high-availability Kubernetes clusters handling **3M+ daily requests with 99.97% uptime**; implemented auto-scaling and self-healing mechanisms.
- Automated 95% of infrastructure configuration management using Ansible, Python, and Bash - reproducible, version-controlled deployments in minutes.
- Introduced unified observability stack (Prometheus, Grafana, Elastic Stack, Sentry) for centralized logging, tracing, and real-time alerting.

Chief Technical Officer (Founding)

- Founded the technical organization and recruited/managed a **12-person cross-functional team** (frontend, backend, mobile, QA, PM, design).
- Architected the full platform end-to-end: **React patient portal, Flutter mobile apps (iOS + Android, live on App Store and Play Store), React admin dashboard**, API and database design.
- Designed AWS infrastructure orchestrating containerized microservices on EKS and ECS with autoscaling, load balancing, and inter-service communication.
- Built a **high-throughput background processing system handling 1M+ daily jobs** (payments, messaging, notifications) using SQS/SNS with provider fallback.
- **Reduced peak latency by 90%** through database query tuning, Redis caching, and PostgreSQL indexing.
- Implemented disaster recovery: parallel GCP environment mirroring AWS with GKE, Cloud SQL, Cloud Storage, and dual-environment CI/CD for rapid failover.

PROJECTS

Palsar - AI Web Monitoring SaaS Founder · 2025

AI-powered web monitoring platform using the Claude API: watches websites and alerts users on relevant changes in plain English. Multiple modes - fixed URL tracking, AI-discovered URLs, and natural-language relevance filtering - from a single prompt architecture.

Stack: Next.js 14, React, TypeScript, Convex (real-time), Anthropic Claude API, Vercel

Root-ID - AI Agent Identity & Messaging Platform Founder · 2025

Identity, discovery, and async messaging platform for AI agents across organizations. Agent registry with cryptographic verification and message inbox without requiring live API connections. Planning open-core release.

Stack: Next.js (React 19), TypeScript, Convex, Playwright E2E, Vercel

Virk Cloud - Kubernetes PaaS Founder & CTO · 2025

Production-grade Kubernetes PaaS (comparable to Vercel) enabling startups to deploy clusters instantly. Built the full management console in Next.js: authentication, cluster management, real-time monitoring dashboards, billing.

Stack: Next.js, TypeScript, Tailwind CSS, Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana

AI Agents for Infrastructure Operations R&D · 2024-Present

Specialized AI agents for QA automation, code review, and sysadmin operations on production Linux servers - fully operational against real systems. Using RAG, tool-use, and multi-agent orchestration patterns.

Stack: Python, Claude API, RAG, tool-use patterns, multi-agent orchestration

EDUCATION

BSc Computer Engineering, Ashesi University

Sep 2016 - May 2020

Berekuso, Ghana

CERTIFICATIONS

AI Engineering Specialization - ByteByteAI

2024

Certified Oracle DevOps Professional

-

Certified Oracle Cloud Solutions Architect Associate

-

SKILLS

Frontend: React, Next.js (SSR/SSG), TypeScript, JavaScript, Tailwind CSS, component architecture, HOC/Render Props/Hooks, state management

Backend: Python (Django, FastAPI, Celery), Node.js (Express), REST, GraphQL, WebSockets

AI & Agents: Claude API, OpenAI API, RAG, tool-use patterns, multi-agent orchestration, AI-assisted development

Mobile: Flutter (iOS + Android, published to App Store and Play Store), React Native fundamentals

Databases: PostgreSQL, MySQL, MongoDB, Redis, Convex (real-time), Firebase/Firestore, SQLite

Testing: Jest, React Testing Library, Cypress, Playwright E2E, pytest

Cloud & Infra: AWS (EKS, ECS, S3, SQS/SNS), GCP (GKE, Cloud SQL), Azure, OCI, Kubernetes, Docker, Helm, Terraform

CI/CD & GitOps: GitHub Actions, FluxCD, ArgoCD, Azure DevOps, Codemagic **Observability:** Prometheus, Grafana, ELK Stack, Sentry

Auth & Security: OAuth2 (Keycloak), OIDC, JWT, 2FA/OTP, Veracode, Trivy, TLS/SSL, WAF

Deployment: Vercel, self-hosted K8s on-prem, Vark Cloud (self-built PaaS), Firebase Hosting
