

Oswald Gyabaah

oswald.gyabaah@gmail.com | linkedin.com/in/ogyabaah | github.com/cyteger | Accra, Ghana (UTC+0)

PROFESSIONAL SUMMARY

Fullstack engineer with 6 years delivering production JavaScript applications end-to-end - React, Next.js, and TypeScript on the frontend; Python and Node.js on the backend; Kubernetes and AWS/GCP for deployment. Ships complete features solo: Next.js + Django OTP service for 600+ banking users; Next.js + Python identity verification tool at GTBank; Virk Cloud PaaS console (Next.js/Convex). Deep AI-assisted development practice - building production agents with Claude, running AI-augmented QA at enterprise scale, holding an AI Engineering Specialization from ByteByteGo. Comfortable working autonomously on client projects across US business hours from Accra.

CORE COMPETENCIES

Fullstack JavaScript / TypeScript

React and Next.js metaframeworks

AI-Assisted Development

Component Architecture and State Management

Python and Node.js Backends

CI/CD and Deployment Infrastructure

Client-Facing Delivery

Open Source Engagement

TECHNICAL SKILLS

Frontend & Mobile: JavaScript, TypeScript, React, Next.js (SSR/SSG/App Router), Tailwind CSS, component architecture, state management (Context, Redux, SWR, Convex), Flutter (iOS + Android)

Backend: Python (Django, FastAPI, Celery), Node.js (Express), REST APIs, GraphQL, WebSockets, real-time subscriptions (Convex)

AI Development: Claude / OpenAI API integration, RAG systems, AI agent development, multi-agent orchestration, tool-use patterns, AI-assisted development workflows

Databases: PostgreSQL, MySQL, MongoDB, Firebase/Firestore, Convex, SQLite, Redis

Testing: Jest, React Testing Library, Cypress, Playwright E2E, pytest, UAT coordination

Cloud & Infrastructure: AWS (EKS, ECS, S3, SQS/SNS, VPC), GCP (GKE, Cloud SQL, Cloud Storage), Azure, OCI, Kubernetes (EKS, GKE, TKG/Tanzu, RKE2), Docker, Helm

CI/CD & Deployment: Terraform, Ansible, GitHub Actions, ArgoCD, FluxCD, Azure DevOps, Vercel, Codemagic

Observability: Prometheus, Grafana, ELK Stack, Sentry

CERTIFICATIONS

AI Engineering Specialization - ByteByteGo	Mar 2026
Oracle Kubernetes Engine Specialist - Oracle	Aug 2025
Certified Oracle Cloud Infrastructure DevOps Professional - Oracle	Aug 2025
AWS Certified Cloud Practitioner - Amazon Web Services	May 2024
Django Web Framework - Coursera	Dec 2022

WORK EXPERIENCE

Guaranty Trust Bank Ghana LTD

May 2025 - Present

Team Lead, Core Banking Services

- Built a bank-wide OTP service using **Next.js** and **Django**, integrating SMS and email gateways; secured core banking access for 600+ internal users with structured logging to Elasticsearch.
- Built an identity verification tool using **Next.js**, **Python/Celery**, and **Redis**, with self-hosted MinIO document storage and automated customer record updates.
- Led end-to-end QA for the bank's Basis-to-Finacle migration: designed and executed 10,000+ test cases across 13 core banking modules and 33 internal apps; used **AI-assisted tooling** to accelerate test generation and log triage.
- Own the on-prem Finacle deployment on Tanzu Kubernetes Grid, managing 800+ production pods sustaining 1.5M+ daily transactions.
- Architected integrations between Finacle core banking and third-party systems including transaction portals and internal tools.

Guaranty Trust Bank Ghana LTD

Apr 2024 - Present

DevOps Engineering Lead

- Implemented **CI/CD automation** that cut deployment time by ~90% and increased release velocity ~5x; introduced **GitOps with FluxCD** for repeatable deployments; integrated Veracode and Trivy scanning into pipelines.
- Founded the bank's DevOps team of 4 engineers and established modern delivery practices: Kubernetes, containerized deployments, automated release workflows.
- Architected high-availability Kubernetes clusters running internal applications handling 3M+ daily requests at 99.97% uptime; implemented auto-scaling and self-healing.
- Managed multi-cloud infrastructure across Azure and AWS: provisioning, private VPC links to on-prem, deployments, access control, cost optimization.

MYHEALTHCOP LTD

Jan 2021 - Mar 2024

Chief Technical Officer (Founding)

- Architected the myhealthcop.com platform end-to-end, delivering three applications: a patient-facing mobile app (**Flutter**), a health professional mobile app, and an admin web dashboard (**React**).
- Designed secure AWS infrastructure running containerized microservices on EKS and ECS with autoscaling, load balancing, and inter-service communication.
- Built a high-throughput background processing system handling **1M+ daily jobs** across payments, messaging, and notifications using SQS/SNS with multi-provider failover.
- Led performance optimizations that reduced peak request latency by **90%** through Redis caching, query tuning, and PostgreSQL indexing.
- Automated application delivery via **CI/CD** on GitHub Actions and Terraform, making deployments repeatable, auditable, and reversible.
- Led a **12-person cross-functional team** (frontend, backend, mobile, product, design, QA) under Agile/Scrum, directly client-facing across product cycles.

PROJECTS

Virk Cloud (virk.cloud) Founder & CTO · Aug 2025

Architected a production-grade Kubernetes PaaS (Vercel-style) with built-in CI/CD, observability, real-time log streaming, and fixed billing. Built the full management console in Next.js with authentication, cluster management, real-time monitoring, and billing - deployed onto the platform itself.

Stack: Next.js, TypeScript, Convex, Tailwind CSS, Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana

Digital-Recon - Transaction Reconciliation Engine Founder · 2025 - Present

Real-time transaction reconciliation engine for financial institutions, detecting discrepancies across heterogeneous data sources (relational DBs, REST APIs, Elasticsearch, Kafka). Next.js / TypeScript triage dashboard lets operators define rules, inspect flagged transactions, drill into source records, and resolve mismatches with a full audit trail.

Stack: React, TypeScript, Next.js, Python, Celery, Kafka, Elasticsearch, PostgreSQL, Docker

AI Agents for Infrastructure Operations Personal R&D · 2024 - Present

Building production AI agents for QA automation, code review, and sysadmin operations on real Linux servers, using Claude API with tool-use and guardrailed execution. Applying agent-driven patterns to SaaS products leveraging RAG, tool-use, and multi-agent orchestration.

Stack: Claude API, Python, tool-use, RAG, multi-agent orchestration

EDUCATION

BSc Computer Engineering - Ashesi University

Sep 2016 - May 2020

Berekuso, Ghana
