PROFESSIONAL SUMMARY

Senior engineer with 6 years shipping production systems across testing, security, backend, and Kubernetes infrastructure. Led a 5-person QA team at GTBank Ghana through a core banking migration with 10,000+ unit, integration, and UAT test cases across 13 modules. Built bank-wide OTP, national ID verification, and Keycloak/OIDC integrations for 600+ users; run 800+ production pods on Kubernetes at 1.5M+ daily transactions. Advanced Bash and Python automation on Linux/macOS, Docker everywhere, AWS IAM in production, messaging with SQS/SNS, Kafka, and RabbitMQ. Currently building Claude-based AI agents for QA and code review on live Linux servers.

TECHNICAL SKILLS

Testing: Jest, React Testing Library, Cypress, Playwright E2E, pytest, UAT coordination, integration testing across microservices
Identity & Security: OAuth2, OIDC, Keycloak, LDAP, JWT, AWS IAM, VPC design, bank-grade access control
Containers & Orchestration: Docker, Docker Compose, Kubernetes (EKS, GKE, TKG/Tanzu, RKE2), Helm, Istio
Automation & Scripting: Advanced Bash on Linux/macOS, Python (FastAPI, Django, Celery), Ansible, Terraform
Backend & Messaging: Node.js (Express), REST/GraphQL/WebSockets, Kafka, RabbitMQ, AWS SQS/SNS, Redis queues
Cloud & CI/CD: AWS, GCP, Azure, OCI; GitHub Actions, Azure DevOps, FluxCD, ArgoCD, Veracode & Trivy scanning
Observability & Data: Prometheus, Grafana, ELK Stack, Sentry; PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
AI & Agents: Claude API, RAG, multi-agent orchestration, tool-use, AI-assisted code review workflows

CERTIFICATIONS

- AI Engineering Specialization (ByteByteAI), Mar 2026 - Agents, RAG, LLM applications
- Oracle Certified DevOps Professional & Architect Associate (Oracle), Aug 2025
- AWS Certified Cloud Practitioner (AWS), May 2024

WORK EXPERIENCE

Guaranty Trust Bank Ghana LTD

Apr 2024 - Present

Accra, Ghana

Team Lead, Core Banking Services

May 2025 - Present

- Led a 5-person QA team through the bank's Basis-to-Finacle migration, designing and executing **10,000+ unit, integration, and UAT test cases** across 13 core banking modules and 33 internal applications under a two-week cutover window.
- Built a bank-wide **OTP and access control service** (Next.js + Django) for 600+ internal users, plus a **national ID verification service** handling document ingestion and customer record updates on self-hosted MinIO.
- Performed code reviews across internal engineering teams, enforcing standards for security, performance, and readability on Python, Node.js, and Next.js services.
- Own the on-prem Finacle deployment on **Tanzu Kubernetes Grid (TKG)**, managing deployments, patching, and incident response across **800+ production pods** sustaining 1.5M+ daily transactions with Docker and Helm.

DevOps Engineering Lead

Apr 2024 - Present

- Founded the bank's DevOps team of 4 engineers, standardizing **Git workflows, code review gates, containerized Kubernetes deployments**, and automated release pipelines.
- Automated **95% of infrastructure configuration** using Ansible, Python, and advanced **Bash scripting**; integrated Veracode + Trivy scanning for security analysis on every merge.
- Architected HA Kubernetes clusters handling 3M+ daily requests at **99.97% uptime**, with a unified observability stack (Prometheus, Grafana, ELK, Sentry).

MYHEALTHCOP LTD

Jan 2021 - Mar 2024

Chief Technical Officer (Founding)

- Architected the platform end-to-end as founding CTO: system design, **AWS IAM and VPC policies**, database modeling, and API development across patient, practitioner, and admin apps.
- Built a high-throughput **event-driven processing system** handling **1M+ daily jobs** with **SQS/SNS** and multi-provider failover, on containerized microservices on **EKS and ECS**.
- Cut peak request latency by **90%** through Redis caching, query tuning, and PostgreSQL indexing, with regression tests and monitoring gates.
- Designed a disaster-recovery strategy mirroring AWS onto GCP with secure VPCs, IAM policies, and dual-environment CI/CD.
- Led a 12-person cross-functional team through the full project lifecycle under Agile/Scrum, with code review and test gates on every pull request.

PROJECTS

AI Agents for QA & Code Review

2024 - Present

Personal R&D

- Building specialized **AI agents for QA automation and code review**, running against live Linux production servers and real codebases - flagging regressions, security issues, and style violations before human review.
- Orchestrating multi-agent workflows using **Claude Code**, RAG over runbooks and style guides, tool-use patterns, and human-in-the-loop approval gates for production changes.
- Completed AI Engineering Specialization (ByteByteAI) covering agents, RAG, and LLM application development.

Virk Cloud (virk.cloud)

Aug 2025 - Present

Founder & CTO

- Architected a multi-tenant PaaS on bare-metal VPS with **RKE2 Kubernetes, Docker, FluxCD, and Terraform**, including container-based test environments for customer workloads.
- Hardened multi-tenant isolation at networking, IAM, and container layers; automated cluster bootstrap and tenant provisioning with advanced **Bash and Python**.

Stack: Kubernetes (RKE2), Docker, FluxCD, Terraform, Next.js, Convex, Python, Bash

EDUCATION

BSc Computer Engineering - Ashesi University

Sep 2016 - May 2020

Berekuso, Ghana
