

Oswald Gyabaah

oswald.gyabaah@gmail.com | linkedin.com/in/ogyabaah | github.com/cyteger | Accra, Ghana

PROFESSIONAL SUMMARY

Senior DevOps / Platform Engineer with 6 years building and running enterprise Kubernetes at scale. Founded GTBank Ghana's DevOps practice from zero - 4-engineer team, 800+ production pods, 99.97% uptime across 3M+ daily requests, and a GitOps pipeline that cut deployment time ~90%. Architected cloud-native platforms on AWS EKS and GCP GKE, with Terraform IaC, ArgoCD / FluxCD, AWS Secrets Manager + KMS, and Prometheus + Grafana observability. Currently building AI agents for infrastructure automation and an internal developer platform (Virk Cloud) on RKE2. Fintech background with 1.5M+ daily banking transactions.

CERTIFICATIONS

Oracle Certified DevOps Professional - Oracle	Aug 2025
Oracle Certified Architect Associate - Oracle	Aug 2025
AWS Certified Cloud Practitioner - AWS	May 2024
AI Engineering Specialization (Agents, RAG, LLM applications) - ByteByteAI	Mar 2026

TECHNICAL SKILLS

Cloud & Kubernetes: AWS (EKS, ECS, VPC, IAM, KMS, Secrets Manager, SQS/SNS), GCP (GKE, Cloud SQL, Cloud Storage), Azure, OCI, on-prem (TKG/Tanzu, RKE2), Helm, Istio service mesh

Infrastructure as Code: Terraform (multi-env, modules), Ansible, Python + Bash automation, declarative deployments

GitOps & CI/CD: ArgoCD, FluxCD, GitHub Actions, Azure DevOps, Jenkins, Veracode + Trivy security scanning

Observability: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana, Filebeat), Sentry

Security & Identity: AWS IAM (roles, policies, boundaries), KMS, Secrets Manager, OAuth2/OIDC, Keycloak, JWT

Platform & Backend: Python (Django, FastAPI, Celery), Node.js, REST/GraphQL/WebSockets, PostgreSQL, Redis, Kafka, RabbitMQ

AI & Agents: Claude API, multi-agent orchestration, tool-use, RAG, AI agents for sysadmin and QA on production Linux

PROFESSIONAL EXPERIENCE

Guaranty Trust Bank Ghana LTD - Accra, Ghana	Apr 2024 - Present
DevOps Engineering Lead	Apr 2024 - Present
- Founded the bank's 4-engineer DevOps team from zero - enforced Git workflows, containerized Kubernetes deployments, and automated release pipelines replacing manual handoffs. - Architected HA Kubernetes clusters at 3M+ daily requests, 99.97% uptime, with FluxCD + Helm + Azure DevOps declarative deployments; CI/CD automation cut deploy time ~90%. - Automated 95% of infrastructure config via Terraform, Ansible, Python, and Bash; integrated Veracode + Trivy scanning on every merge. - Managed multi-cloud AWS + Azure: VPC networking, private links to on-prem, IAM access control, cost optimization; unified observability (Prometheus, Grafana, ELK, Sentry) cutting MTTR.	
Team Lead, Core Banking Services	May 2025 - Present
- Own the on-prem Finacle deployment on Tanzu Kubernetes Grid (TKG) - 800+ pods with Istio service mesh, RBAC-based multi-tenant isolation, and Helm releases sustaining 1.5M+ daily banking transactions. - Extended Prometheus/Grafana into core banking with Finacle-specific dashboards + threshold-based alerting; structured Elasticsearch logging via Filebeat for audit and incident response. - Led a 5-person QA team through the Basis-to-Finacle migration, executing 10,000+ test cases across 13 modules and 33 internal applications in a two-week cutover.	

Chief Technical Officer (Founding)

- Architected the platform end-to-end on AWS EKS and ECS with autoscaling, VPC peering, and multi-environment account isolation from day one.
- Provisioned infrastructure with Terraform and GitHub Actions CI/CD across Dev/Staging/Prod; AWS Secrets Manager + KMS for secrets and encryption.
- Designed multi-cloud DR mirroring AWS EKS onto GCP GKE with secure VPCs, IAM policies, and dual-environment CI/CD for rapid failover.
- Built an SQS/SNS background processing system handling 1M+ daily jobs; cut peak latency 90% via Redis caching, query tuning, and PostgreSQL indexing.
- Led a 12-person cross-functional team through full project lifecycle under Agile/Scrum.

PROJECTS

Virk Cloud (virk.cloud) - Internal Developer Platform

Aug 2025 - Present

Founder & CTO

- Built an internal developer platform on RKE2 Kubernetes with FluxCD GitOps, Terraform-provisioned infrastructure, per-tenant namespace isolation, and self-service deployments - the same platform-engineering patterns used at hyperscalers.
- Designed the management console in Next.js with authentication, billing, real-time monitoring, and log streaming; hardened multi-tenant isolation at networking, IAM, and container layers.

Stack: Kubernetes (RKE2), Docker, FluxCD, Terraform, Next.js, Convex, Prometheus, Grafana, Python, Bash

AI Agents for Infrastructure Operations

2024 - Present

Personal R&D

- Building specialized AI agents for QA automation, code review, and sysadmin operations - running against live Linux production servers with RAG over runbooks, tool-use, and human-in-the-loop approval gates.
- Prototyping agent-driven SaaS tools using Claude Code, multi-agent orchestration, and production-safe execution patterns.

EDUCATION

BSc Computer Engineering - Ashesi University

Sep 2016 - May 2020

Berekuso, Ghana
