

Oswald Gyabaah

oswald.gyabaah@gmail.com | linkedin.com/in/ogyabaah | github.com/qclaire | virk.cloud | Accra, Ghana

PROFESSIONAL SUMMARY

Full-stack engineer with 6 years building and shipping production applications end-to-end -- from React/Next.js frontends to Python/Node.js backends to Kubernetes infrastructure. Built 3 web applications and a Flutter mobile app as founding CTO (MyHealthCop, 12-person team), founded GTBank Ghana's DevOps team from scratch (800+ pods, 99.97% uptime on 3M+ daily requests), and now ships AI-powered SaaS products using RAG, tool-use, and multi-agent patterns. Combines deep fullstack JavaScript/TypeScript fluency with production infrastructure expertise and hands-on AI agent development. See: [virk.cloud](#)

CORE COMPETENCIES

Fullstack Development

React & Next.js

Python & Node.js

AI Agent Development

Component Architecture

Kubernetes & Cloud Infrastructure

CI/CD & GitOps

API & Database Design

Performance Optimization

Team Leadership & Coaching

PROFESSIONAL EXPERIENCE

Guaranty Trust Bank Ghana LTD

May 2025 -- Present

Manager, Finacle Services Team

- Manage 800+ production pods on Tanzu Kubernetes Grid sustaining **1.5M+ daily banking transactions** -- full cluster lifecycle: deployments, patching, incident response
- Designed and deployed a bank-wide OTP verification service: **Next.js frontend + Django API backend** with SMS/email gateway integrations and Elasticsearch logging, securing logins for 600+ internal users
- Built a Ghana Card verification tool (**Next.js + Python/Celery + Redis**): national ID verification for bank customers with document storage in self-hosted MinIO
- Led end-to-end QA for core banking migration: planned and executed **10,000+ test cases** across 13 modules and 33 applications, coordinating UAT with business stakeholders
- Built observability dashboards tracking CPU/memory, transaction volumes, response times, and categorized exceptions for threshold-based alerting

Guaranty Trust Bank Ghana LTD

Apr 2024 -- May 2025

DevOps Engineering Lead

- Founded the bank's DevOps team of 4 engineers -- introduced Kubernetes, containerized deployments, version control, and automated release workflows; **mentored 3 junior engineers** to independence
- CI/CD automation cut deployment time by **~90%** and increased release velocity **~5x**; GitOps with FluxCD; Veracode and Trivy for automated security scanning
- Architected HA Kubernetes clusters handling **3M+ daily requests at 99.97% uptime** with auto-scaling and self-healing
- Automated **95%** of infrastructure config management using Ansible, Python, and Bash -- multi-day manual processes reduced to minutes
- Unified observability stack: Prometheus, Grafana, Elastic Stack, Sentry for centralized logging, tracing, and real-time alerting

Chief Technical Officer (Founding)

- Recruited and led a **12-person cross-functional team** (2 frontend React, 3 backend Python, 2 Flutter mobile, 2 PMs, 2 designers, 1 QA) -- full project lifecycle from requirements through delivery
- Architected and built **3 distinct applications**: React patient-facing web portal, Flutter mobile app (published to App Store + Play Store), and React admin management dashboard
- Designed secure service layers and database architecture on AWS (EKS/ECS) with autoscaling, load balancing, and inter-service communication
- Built high-throughput background processing handling **1M+ daily jobs** (payments, messaging, notifications) using SQS/SNS with provider failover
- Reduced peak latency by **90%** through PostgreSQL query tuning, Redis caching layers, and indexing
- Designed disaster recovery: parallel GCP environment mirroring AWS (GKE, Cloud SQL, Cloud Storage) with dual-environment CI/CD

PROJECTS

Palsar -- AI Web Monitoring SaaS 2025

AI-powered platform using Claude API that watches websites and alerts users on relevant changes in plain English. Multiple monitoring modes with natural language relevance filtering and multi-channel notifications.

Next.js 14, React, TypeScript, Convex (real-time backend), Anthropic Claude API, Vercel

Virk Cloud -- virk.cloud 2025

Production-grade Kubernetes PaaS for startups. Built the full management console (Next.js): authentication, cluster management, real-time monitoring, billing. Automated deployments with FluxCD and Terraform.

Next.js, TypeScript, Tailwind CSS, Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana

Root-ID -- AI Agent Identity Platform 2025

Identity, discovery, and async messaging platform for AI agents across organizations. Agent registry with cryptographic verification and message inbox.

Next.js (React 19), TypeScript, Convex (real-time), Playwright E2E tests, Vercel

AI Agents for Infrastructure Operations 2024 -- Present

Specialized AI agents for QA automation, code review, and sysadmin operations on production Linux servers. RAG, tool-use, and multi-agent orchestration patterns against real systems.

Python, Claude API, RAG, multi-agent orchestration

EDUCATION

BSc Computer Engineering -- Ashesi University

2016 -- 2020

CERTIFICATIONS

AI Engineering Specialization -- ByteByteAI

Certified Oracle DevOps Professional

Certified Oracle Cloud Solutions Architect Associate

TECHNICAL SKILLS

Frontend: React, Next.js (SSR/SSG), TypeScript, JavaScript, Tailwind CSS, HOC/Hooks patterns, component architecture

Mobile: Flutter (iOS + Android, App Store + Play Store)

Backend: Python (Django, FastAPI, Celery), Node.js (Express), REST APIs, GraphQL, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Convex, Redis

AI & Agents: LLM API integration (Claude, OpenAI), RAG, AI agents, multi-agent orchestration, tool-use patterns

Cloud: AWS (EKS, ECS, SQS/SNS, VPC), GCP (GKE, Cloud SQL), Azure, OCI

Infrastructure: Kubernetes (EKS, GKE, TKG, RKE2), Docker, Helm, Terraform, Ansible

CI/CD: GitHub Actions, Azure DevOps, FluxCD, ArgoCD, Codemagic **Observability:** Prometheus, Grafana, ELK Stack, Sentry

Testing: Jest, Cypress, Playwright E2E, pytest
