

Oswald Gyabaah

oswald.gyabaah@gmail.com | linkedin.com/in/ogyabaah | github.com/qclaire | virk.cloud | Accra, Ghana

PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with 6 years running production infrastructure across Azure, AWS, GCP, and on-prem Kubernetes. Founded GTBank Ghana's DevOps team (800+ pods, 99.97% uptime on 3M+ daily requests), deployed Azure DevOps CI/CD pipelines and Terraform IaC daily, and ship FastAPI + Python backends alongside the infrastructure I run. Built a production-grade Kubernetes PaaS ([virk.cloud](#)) and two AI SaaS products (Palsar, Root-ID) using Claude API with RAG, tool-use, and multi-agent orchestration patterns -- directly relevant to human-led AI orchestration workloads.

CORE COMPETENCIES

Azure & AKS

Terraform & IaC

Azure DevOps & GitHub Actions

CI/CD & GitOps (FluxCD)

Kubernetes (Production at Scale)

Docker & Containers

FastAPI & Python Backends

Cloud Security & Networking

Observability & Incident Response

AI Orchestration & Agents

Multi-tenant SaaS

PROFESSIONAL EXPERIENCE

Guaranty Trust Bank Ghana LTD Apr 2024 -- May 2025

DevOps Engineering Lead

- Founded the bank's DevOps team of 4 -- introduced Kubernetes, containerized deployments, and **Azure DevOps + GitHub Actions** CI/CD from scratch; mentored 3 junior engineers to independence
- CI/CD automation cut deployment time **~90%**, increased release velocity **~5x**; **GitOps with FluxCD** for stateless, idempotent cluster deployments; Veracode + Trivy automated security scanning
- Architected HA Kubernetes clusters handling **3M+ daily requests at 99.97% uptime** with auto-scaling, self-healing, and rapid DR cluster rebuilds
- Managed **multi-cloud infrastructure on Azure and AWS**: provisioning, private VPC links to on-prem, access control, cost optimization; ran Azure-hosted GTExpress + GTWorld
- Automated **95%** of infra config with Ansible + Python + Bash; unified observability stack (Prometheus, Grafana, Elastic Stack, Sentry) for centralized logging, tracing, alerting

Guaranty Trust Bank Ghana LTD May 2025 -- Present

Manager, Finacle Services Team

- Manage 800+ production pods on Tanzu Kubernetes Grid sustaining **1.5M+ daily banking transactions** -- full cluster lifecycle, incident response, performance tuning
- Built a **Ghana Card verification tool (FastAPI + Python/Celery + Redis)** with self-hosted MinIO storage -- national ID verification for bank customers; directly matches Backend Enablement scope (FastAPI deployment, scaling, runtime optimization)
- Deployed bank-wide **OTP verification service**: Next.js + Django API with SMS/email gateways, Filebeat-to-Elasticsearch logging for full audit trail
- Lead L2 support -- correlate transactional + application logs across core banking microservices via Elastic Stack; observability dashboards for CPU/memory, transaction volumes, categorized exceptions

MYHEALTHCOP LTD Jan 2021 -- Mar 2024

Chief Technical Officer (Founding)

- Designed secure AWS infrastructure on **EKS and ECS** with autoscaling and load balancing; automated provisioning with **Terraform (90%** setup-time reduction) and CI/CD pipelines
- Implemented **disaster recovery**: parallel GCP environment mirroring AWS (GKE, Cloud SQL, Cloud Storage) with secure VPCs, IAM policies, dual-environment CI/CD for rapid failover
- Built event-driven background processing for **1M+ daily jobs** on **SQS/SNS** with dead-letter queues, retry/backoff, and provider failover
- Reduced peak latency by **90%** via PostgreSQL query tuning, Redis caching, and indexing; led a 12-person cross-functional team from zero

PROJECTS

Virk Cloud -- virk.cloud 2025

Production-grade multi-tenant Kubernetes PaaS (comparable to Vercel) -- startups deploy clusters instantly without operational overhead. Full infra on VPS: cluster deployment (RKE2), storage/network provisioning, DNS, traffic management. All deployments automated with FluxCD and Terraform.

Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana, Next.js management console

Palsar -- AI Web Monitoring SaaS 2025

AI-powered platform using Claude API for production AI/ML workloads -- watches websites and alerts users on relevant changes in plain English. Multiple monitoring modes with natural language relevance filtering, multi-channel notifications, and serverless architecture.

Next.js 14, TypeScript, Convex (serverless real-time backend), Anthropic Claude API, Vercel

Root-ID -- AI Agent Identity Platform 2025

Identity, discovery, and async messaging platform for AI agents across organizations -- agent registry with cryptographic verification and message inbox. Directly relevant to human-led AI orchestration infrastructure.

Next.js (React 19), TypeScript, Convex (real-time), Playwright E2E tests, Vercel

AI Agents for Infrastructure Operations 2024 -- Present

Specialized AI agents running in production for QA automation, code review, and sysadmin operations on real Linux servers managing 800+ Kubernetes pods. RAG, tool-use, and multi-agent orchestration patterns.

Python, Claude API, RAG, multi-agent orchestration, production Linux

EDUCATION

BSc Computer Engineering -- Ashesi University

2016 -- 2020

CERTIFICATIONS

Certified Oracle Cloud Solutions Architect Associate

Certified Oracle DevOps Professional

AI Engineering Specialization -- ByteByteAI (Agents, RAG, LLM applications)

TECHNICAL SKILLS

Cloud: Azure (AKS, Azure DevOps), AWS (EKS, ECS, SQS/SNS, VPC), GCP (GKE, Cloud SQL), OCI, on-prem

Kubernetes: AKS, EKS, GKE, TKG/Tanzu, RKE2, Helm, Istio

IaC & CI/CD: Terraform, Ansible, Azure DevOps, GitHub Actions, FluxCD, ArgoCD Containers: Docker, containerd

Backend: Python (FastAPI, Django, Celery), Node.js (Express), REST APIs, WebSockets

Observability: Prometheus, Grafana, ELK Stack, Sentry, Azure Monitor (equivalent)

Security: OAuth2/OIDC (Keycloak), JWT, Veracode, Trivy, IPSec/OpenVPN, TLS/SSL, WAF, secrets/Key Vault

Event-Driven: SQS/SNS, dead-letter queues, provider failover, Kafka, Redis queues, Convex

AI & Agents: Claude/OpenAI API, RAG, multi-agent orchestration, tool-use patterns

Data: PostgreSQL, MySQL, Redis, MinIO, Convex, MongoDB
