

Oswald Gyabaah

oswald.gyabaah@gmail.com | linkedin.com/in/ogyabaah | github.com/cyteger | Accra, Ghana (UTC+0)

PROFESSIONAL SUMMARY

Fullstack engineer with 6 years delivering production JavaScript applications end-to-end - React, Next.js, and TypeScript on the frontend; Python and Node.js on the backend; Kubernetes and AWS/GCP for deployment. Ships complete features solo: Next.js + Django OTP service for 600+ banking users; Next.js + Python identity verification tool at GTBank; Virk Cloud PaaS console (Next.js/Convex). Deep AI-assisted development practice - building production agents with Claude, running AI-augmented QA at enterprise scale, holding an AI Engineering Specialization from ByteByteGo. Comfortable working autonomously on client projects across US business hours from Accra.

CORE COMPETENCIES

Fullstack JavaScript / TypeScript

React and Next.js

AI-Assisted Development (Claude Code, LLM tooling)

Python and Node.js

CI/CD and Deployment Automation

TECHNICAL SKILLS

Frontend (Web & Mobile): JavaScript, TypeScript, React, Next.js, Tailwind CSS, component architecture, state management, Flutter

Backend and DBs: Python (Django, FastAPI), Node.js (Express), REST APIs, GraphQL, WebSockets, PostgreSQL, MySQL, Redis, MongoDB

AI Development: Claude / OpenAI API integration, RAG systems, AI agent development, multi-agent orchestration, tool-use patterns, AI-assisted development workflows, LLM evaluation

Testing: Jest, React Testing Library, Cypress, Playwright E2E, pytest

Cloud & Infrastructure: AWS (EKS, ECS, S3, SQS/SNS, VPC), GCP (GKE, Cloud SQL, Cloud Storage), Azure, OCI, Kubernetes (EKS, GKE, TKG/Tanzu, RKE2), Docker, Helm

CI/CD & Deployment: Terraform, Ansible, GitHub Actions, FluxCD, Azure DevOps, Jenkins

Observability: Prometheus, Grafana, ELK Stack, Sentry

PROFESSIONAL CERTIFICATIONS

AI Engineering Specialization (ByteByteGo), Mar 2026: Agents, RAG, LLM applications

Oracle Kubernetes Engine Specialist (Oracle), Aug 2025

AWS Certified Cloud Practitioner (AWS), May 2024

Django Web Framework (Coursera), Dec 2022

Database Structures and Management with MySQL (Coursera), Dec 2022

PROFESSIONAL EXPERIENCE

Team Lead, Core Banking Services

Guaranty Trust Bank Ghana LTD | May 2025 - Present

- Built a bank-wide OTP service integrating SMS and email gateways to secure core banking access for 600+ internal users with structured logging to Elasticsearch.
- Built an ID verification service using Next.js and Python to process and store customer ID documents in MinIO with automated verification and record updates.
- Led end-to-end QA for the bank's Basis-to-Finacle migration, designing and executing 10,000+ test cases across 13 core banking modules and 33 internal applications; used AI-assisted tooling to accelerate test case generation and log triage.
- Own the on-prem Finacle deployment on Tanzu Kubernetes Grid, managing 800+ production pods sustaining 1.5M+ daily transactions.
- Architected integrations between Finacle core banking and third-party systems including transaction portals and internal tools.

DevOps Engineering Lead

Guaranty Trust Bank Ghana LTD | Apr 2024 - Present

- Founded the bank's DevOps team of 4 engineers and established modern delivery practices, introducing Kubernetes, containerized deployments, and automated release workflows.
- Implemented CI/CD automation that cut deployment time by ~90% and increased release velocity ~5x; introduced GitOps with FluxCD for repeatable deployments; integrated Veracode and Trivy scanning into pipelines.
- Architected high-availability Kubernetes clusters running internal applications handling 3M+ daily requests at 99.97% uptime; implemented auto-scaling and self-healing.
- Managed multi-cloud infrastructure across Azure and AWS: provisioning, private VPC links to on-prem, deployments, access control, cost optimization.

Chief Technical Officer (Founding)

MYHEALTHCOP LTD | Jan 2021 - Mar 2024

- Architected the myhealthcop.com platform end-to-end, delivering three applications: a patient-facing mobile app (Flutter), a health professional mobile app, and an admin web dashboard (React).
- Designed secure AWS infrastructure running containerized microservices on EKS and ECS with autoscaling, load balancing, and inter-service communication.
- Built a high-throughput background processing system handling 1M+ daily jobs across payments, messaging, and notifications using SQS/SNS with multi-provider failover.
- Led performance optimizations that reduced peak request latency by 90% through Redis caching, query tuning, and PostgreSQL indexing.
- Automated application delivery via CI/CD on GitHub Actions and Terraform, making deployments repeatable, auditable, and reversible.
- Led a 12-person cross-functional team (frontend, backend, mobile, product, design, QA) under Agile/Scrum, directly client-facing across product cycles.

PROJECTS

Virk Cloud (virk.cloud)

Founder & CTO | Aug 2025

Architected a production-grade Kubernetes PaaS (Vercel-style) with built-in CI/CD, observability, real-time log streaming, and fixed billing.

Built the full management console in Next.js with authentication, cluster management, real-time monitoring dashboards, and billing - deployed onto the platform itself.

Stack: Next.js, TypeScript, Convex, Tailwind CSS, Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana

Digital-Recon: Transaction Reconciliation Engine

Founder | 2025 - Present

Built a real-time transaction reconciliation engine for financial institutions, detecting discrepancies across heterogeneous data sources (relational DBs, REST APIs, Elasticsearch, Kafka).

Designed a Next.js / TypeScript triage dashboard enabling operators to define rules, inspect flagged transactions, drill into source records, and resolve mismatches with a full audit trail.

Architected an event-driven processing layer using Kafka for ingestion and Celery for scheduled and on-demand reconciliation jobs.

Stack: React, TypeScript, Next.js, Python, Celery, Kafka, Elasticsearch, PostgreSQL, Docker

AI Agents for Infrastructure Operations

Personal R&D | 2024 - Present

Building production AI agents for QA automation, code review, and sysadmin operations on real Linux servers, using Claude API with tool-use and guardrailed execution.

Applying agent-driven patterns to SaaS products leveraging RAG, tool-use, and multi-agent orchestration.

Completed AI Engineering Specialization (ByteByteGo) covering agents, RAG, and LLM application development.

EDUCATION

Ashesi University | BSc Computer Engineering | Sep 2016 - May 2020 | Berekuso, Ghana
