PROFESSIONAL SUMMARY

Infrastructure architect with 6 years designing and operating enterprise-grade on-prem and multi-cloud estates - AWS, GCP, Azure, and OCI - across data centers, Kubernetes, networks, and disaster recovery. Founded Guaranty Trust Bank Ghana's DevOps practice from scratch and architected high-availability Kubernetes at 99.97% uptime over 3M+ daily requests. Founder of Virk Cloud, a production Kubernetes PaaS built on bare metal. I design cost-efficient, secure, resilient infrastructure governed by clear standards, and automate it end to end with Terraform, Ansible, and GitOps.

CORE COMPETENCIES

Infrastructure Architecture

Multi-Cloud (AWS, GCP, Azure, OCI)

Kubernetes & Virtualization

Disaster Recovery & High Availability

Infrastructure as Code

Data Center Operations

CI/CD & GitOps

Architecture Governance

WORK EXPERIENCE

Guaranty Trust Bank Ghana LTD

Apr 2024 - Present

DevOps Engineering Lead - Accra, Ghana

- Founded and led the bank's DevOps practice from zero, defining and enforcing infrastructure standards across containerized Kubernetes deployments and automated release pipelines.
- Architected **high-availability Kubernetes clusters** across multiple on-prem environments running internal applications at 3M+ daily requests with **99.97% measured uptime**, with auto-scaling and self-healing.
- Managed multi-cloud infrastructure across Azure and AWS - resource provisioning, private VPC links to on-prem systems, access control, and cost optimization.
- Automated 95% of infrastructure configuration management with Terraform, Ansible, and Python; implemented declarative GitOps deployments with FluxCD and Helm for idempotency and rapid disaster-recovery rebuilds.
- Introduced a unified observability stack (Prometheus, Grafana, Elastic Stack, Sentry) for centralized logging, tracing, and real-time alerting; integrated Veracode and Trivy security scanning.

Guaranty Trust Bank Ghana LTD

May 2025 - Present

Core Banking Services Lead - Accra, Ghana

- Own the on-prem Finacle core banking platform on Tanzu Kubernetes Grid (VMware TKG), managing **800+ production pods** in Tier III data centers to sustain 1.5M+ daily financial transactions.
- Architected integrations between Finacle core banking and third-party systems including transaction portals and internal tools.
- Analysed capacity trends and extended observability with infrastructure dashboards and threshold-based alerting for proactive scaling and lifecycle management.
- Led L2 incident response, correlating logs across core banking microservices via the Elastic Stack for root-cause analysis and remediation.

MyHealthCop LTD

Jan 2021 - Mar 2024

Chief Technical Officer (Founding) - Accra, Ghana

- Designed secure, cost-efficient AWS infrastructure running containerized microservices on EKS and ECS alongside Lambda, with autoscaling, load balancing, and inter-service communication.
- Designed a **disaster recovery strategy** mirroring the AWS production environment on GCP - GKE, Cloud SQL, Cloud Storage - with secure VPCs, IAM policies, and dual-environment CI/CD for rapid failover.
- Automated application delivery and infrastructure provisioning via CI/CD pipelines on GitHub Actions and Terraform, making deployments repeatable, auditable, and reversible.
- Architected the platform end to end and led a 12-person cross-functional engineering team through the full delivery lifecycle under Agile/Scrum.

PROJECTS

Virk Cloud (virk.cloud) - Kubernetes PaaS Infrastructure Architecture

Founder & CTO. Architected and built a production Platform-as-a-Service on bare-metal infrastructure - instant cluster deployment with built-in CI/CD, observability, and log streaming. Provision and manage the underlying hardware, network, and cluster estate end to end.
Stack: Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana, bare-metal VPS, Next.js, Python

AI Agents for Infrastructure Operations Automation & AI

Personal R&D. Building specialized AI agents for QA automation, code review, and sysadmin operations, running against live Linux production servers. Prototyping agent-driven tooling using RAG, tool-use, and multi-agent orchestration to automate infrastructure operations.
Stack: Python, Anthropic API, OpenAI API, RAG, AWS Lambda, EventBridge, Linux

CERTIFICATIONS

AI Engineering Specialization - ByteByteAI	Mar 2026
Oracle Certified DevOps Professional - Oracle (OCI)	Aug 2025
Oracle Certified Architect Associate - Oracle (OCI)	Aug 2025
Oracle Certified Foundations Associate - Oracle (OCI)	Jul 2025
AWS Certified Cloud Practitioner - AWS	May 2024

EDUCATION

BSc Computer Engineering - Ashesi University	Sep 2016 - May 2020
Berekuso, Ghana	

SKILLS

- Cloud Platforms:** AWS (EKS, ECS, Lambda, VPC, IAM), GCP (GKE, Cloud SQL, Cloud Storage), Azure, OCI
- Infrastructure & Containers:** Kubernetes (EKS, GKE, TKG/Tanzu, RKE2), Docker, Helm, Istio, VMware vSphere, on-prem bare metal (Tier III data centers)
- IaC & Automation:** Terraform, Ansible, Python, Bash
- CI/CD & GitOps:** GitHub Actions, Azure DevOps, FluxCD, ArgoCD, Jenkins
- Resilience & Operations:** Disaster recovery, high availability, auto-scaling, capacity planning, lifecycle management
- Networking & Security:** VPC design, private VPC links, load balancing, WAF, IAM, OAuth2/Keycloak, OIDC, LDAP, JWT, Veracode, Trivy
- Observability:** Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana, Filebeat), Sentry
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
