

Oswald Gyabaah

oswald.gyabaah@gmail.com | linkedin.com/in/ogyabaah | github.com/cyteger | Accra, Ghana

PROFESSIONAL SUMMARY

Senior full-stack JavaScript engineer with 6 years shipping production systems end-to-end: React and Next.js frontends, Node.js and Python backends, and AWS serverless infrastructure (Lambda, DynamoDB, CloudFormation, API Gateway). Founded MyHealthCop as CTO and delivered three apps plus AWS/GCP infrastructure with 1M+ daily background jobs. At GTBank Ghana, took over an in-flight core banking platform and now operate 800+ production pods at 99.97% uptime with 1.5M+ daily transactions. Comfortable inheriting live codebases, evolving them with minimal hand-holding, and shipping from day one. Strong async communication; steady, low-drama operator.

PROFESSIONAL CERTIFICATIONS

- AI Engineering Specialization (ByteByteAI), Mar 2026
- Oracle Certified Architect Associate (Oracle), Aug 2025
- Oracle Certified DevOps Professional (Oracle), Aug 2025
- AWS Certified Cloud Practitioner (AWS), May 2024

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Vue-adjacent reactive patterns, Tailwind CSS, Flutter

Backend: Node.js (Express, Lambda handlers), Python (Django, FastAPI, Celery), REST APIs, GraphQL, WebSockets

AWS Serverless: Lambda, DynamoDB (single-table design), API Gateway, CloudFormation, SQS/SNS, S3, CloudWatch, X-Ray, IAM, KMS

AWS Broader: EKS, ECS, VPC networking, cost optimization and billing analysis

Other Cloud & Infra: GCP (GKE, Cloud SQL, Cloud Storage), Azure, OCI, Kubernetes (EKS, GKE, TKG, RKE2), Terraform, Ansible, Helm

Databases: DynamoDB, PostgreSQL, MongoDB, MySQL, Firebase/Firestore, Redis, Convex

CI/CD & GitOps: GitHub Actions (incl. serverless deploys), FluxCD, ArgoCD, Azure DevOps, Codemagic

Observability: CloudWatch, X-Ray, Prometheus, Grafana, ELK Stack, Sentry

Testing: Jest, React Testing Library, Playwright E2E, Cypress, pytest, UAT coordination

PROFESSIONAL EXPERIENCE

Guaranty Trust Bank Ghana LTD - Accra, Ghana

Team Lead, Core Banking Services

Apr 2024 - Present

May 2025 - Present

- Took over an in-flight Finacle deployment on Tanzu Kubernetes Grid mid-migration; onboarded fast and now operate 800+ production pods sustaining 1.5M+ daily transactions.
- Led a 5-person QA team through the Basis-to-Finacle cutover, executing 10,000+ test cases across 13 modules and 33 applications in a two-week window.
- Built a bank-wide OTP service (Next.js + Node.js + Django) integrating SMS and email gateways for 600+ internal users.
- Extended observability into core banking with Finacle-specific dashboards and threshold-based alerting for proactive scaling.

DevOps Engineering Lead

Apr 2024 - Present

- Founded the bank's DevOps team of 4 from zero; introduced enforced Git workflows, containerized deployments, and automated release pipelines replacing manual handoffs.
- Implemented CI/CD on GitHub Actions and Azure DevOps that cut deployment time ~90% and increased release velocity ~5x, with Veracode and Trivy scanning on every merge.
- Architected HA Kubernetes clusters handling 3M+ daily requests at 99.97% uptime; managed multi-cloud AWS and Azure infrastructure with private VPC links, IAM, and cost controls.

Chief Technical Officer (Founding)

- Architected myhealthcop.com end-to-end: requirements, system design, data modelling (PostgreSQL + DynamoDB single-table for high-volume events), and APIs - delivered a patient Flutter app, a provider Flutter app, and a React admin dashboard.
- Built AWS serverless services: Lambda behind API Gateway, DynamoDB for audit and notification data, and SQS/SNS handling 1M+ daily background jobs across payments, messaging, and notifications with multi-provider failover.
- Wrote Infrastructure as Code on CloudFormation and Terraform for repeatable, reversible deployments across Dev/Staging/Prod on GitHub Actions CI/CD.
- Designed a multi-cloud DR strategy mirroring AWS onto GCP (GKE, Cloud SQL, Cloud Storage) with secure VPCs, IAM, and dual-environment CI/CD for rapid failover.
- Cut peak request latency 90% through Redis caching, DynamoDB access-pattern tuning, and PostgreSQL optimisation. Led a 12-person cross-functional team under Agile/Scrum.

PROJECTS

Virk Cloud (virk.cloud) - Developer Platform

Aug 2025 - Present

Founder & CTO

- Architected a Platform-as-a-Service with built-in CI/CD, fixed billing, real-time log streaming, and alerting; built the full management console in Next.js with authentication and monitoring.
- Manage the underlying RKE2 Kubernetes cluster, storage, networking, and DNS.

Stack: Next.js, TypeScript, Node.js, Convex, Kubernetes (RKE2), FluxCD, Terraform, Prometheus, Grafana

Vistara - Property Tenant Assessment Platform

2026 - Present

Founder

- Multi-app platform for renters to evaluate housing before signing leases: landing page, tenant web app, admin dashboard, admin mobile app. iOS in TestFlight; web apps in beta.

Stack: Next.js, React, TypeScript, Node.js API routes, Flutter, Codemagic CI/CD

EDUCATION

BSc Computer Engineering, Ashesi University

Sep 2016 - May 2020

Berekuso, Ghana
