PROFESSIONAL SUMMARY

Senior DevOps Engineer with 6 years designing and running high-scale Kubernetes platforms in production. Founded Guaranty Trust Bank Ghana's DevOps team - CI/CD automation that cut deployment time ~90%, GitOps with FluxCD, and high-availability Kubernetes infrastructure on Azure and AWS with private VPC links to on-prem core banking. Manage 800+ production pods sustaining 1.5M+ daily banking transactions with 99.97% measured uptime. On AWS specifically: architected EKS + ECS microservices with Terraform IaC, IAM, VPC peering, SQS/SNS, and a disaster-recovery mirror on GCP. Currently operating a multi-tenant Kubernetes Platform-as-a-Service (Virk Cloud) with RKE2, FluxCD, and Terraform, and building AI agents for infrastructure automation. ---

CERTIFICATIONS

AWS Certified Cloud Practitioner (AWS), May 2024
Oracle Certified DevOps Professional (Oracle), Aug 2025
Oracle Certified Architect Associate (Oracle), Aug 2025
Oracle Certified Foundations Associate (Oracle), Jul 2025
AI Engineering Specialization (ByteByteAI), Mar 2026: Agents, RAG, LLM applications
Database Structures and Management with MySQL (Coursera), Dec 2022
Django Web Framework (Coursera), Dec 2022

SKILLS

Cloud & Infrastructure: AWS (EKS, ECS, S3, SQS/SNS, VPC, IAM), Azure, GCP (GKE, Cloud SQL, Cloud Storage), OCI, VMware, on-prem bare metal (Tier III data centers)
Container Orchestration: Docker, Docker Compose, Kubernetes (EKS, GKE, TKG/Tanzu, RKE2, AKS), Helm, Istio Service Mesh
IaC & GitOps: Terraform, Ansible, FluxCD, ArgoCD, GitHub Actions, Azure DevOps, Jenkins, Codemagic
Observability: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana, Filebeat), Sentry
Backend: Python (FastAPI, Django, Celery), Node.js (Express), REST APIs, GraphQL, WebSockets
Databases: PostgreSQL, MySQL, MongoDB, Redis, Firebase/Firestore, Convex, SQLite
Messaging & Queues: AWS SQS/SNS, RabbitMQ, Redis queues, Kafka
AI & Agents: LLM API integration (Claude, OpenAI), RAG systems, AI agent development, multi-agent orchestration, tool-use patterns

WORK EXPERIENCE

Guaranty Trust Bank Ghana LTD

Apr 2024 - Present

Accra, Ghana

DevOps Engineering Lead

Apr 2024 - Present

- Founded the bank's DevOps team of 4 engineers, replacing manual code handoffs with enforced Git workflows, containerized Kubernetes deployments, and automated release pipelines.
- Implemented CI/CD automation that cut deployment time by ~90% and increased release velocity ~5x; introduced GitOps with FluxCD for consistent, repeatable deployments across multiple clusters; integrated Veracode and Trivy scanning for automated security analysis.
- Architected high-availability Kubernetes clusters across multiple on-prem environments running internal applications handling 3M+ daily requests, with 99.97% measured uptime inclusive of monthly scheduled maintenance.
- Managed multi-cloud infrastructure across AWS and Azure: resource provisioning, private VPC peering to on-prem systems, IAM, access control, and cost optimization.
- Automated 95% of infrastructure configuration management using Terraform, Ansible, Python, and Bash, turning multi-day manual processes into reproducible, version-controlled deployments.
- Implemented declarative, version-controlled cluster deployments with FluxCD, Helm, and Azure DevOps for consistency, idempotency, and rapid disaster recovery rebuilds.
- Introduced a unified observability stack (Prometheus, Grafana, Elastic Stack, Sentry) for centralized logging, tracing, and real-time alerting, reducing mean time to resolution on production incidents.

Team Lead, Core Banking Services

May 2025 - Present

- Own the on-prem Finacle core banking deployment on Tanzu Kubernetes Grid, managing deployments, patching, and incident response across 800+ production pods to sustain 1.5M+ daily transactions.
- Extended the bank's observability stack into core banking with Finacle-specific dashboards for CPU/memory trends, transaction volumes, response times, and exceptions, plus threshold-based alerting for proactive scaling.
- Led L2 incident response, correlating logs across internal apps and core banking microservices via the Elastic Stack for root-cause analysis and remediation.
- Led a 5-person QA team through the bank's Basis-to-Finacle migration cutover, designing and executing 10,000+ test cases across 13 core banking modules and 33 internal applications over a two-week window.
- Architected integrations between Finacle core banking and third-party systems including transaction portals and internal tools.

MYHEALTHCOP LTD

Jan 2021 - Mar 2024

Chief Technical Officer (Founding)

Accra, Ghana

- Designed secure, cost-efficient AWS infrastructure running containerized microservices on EKS and ECS with autoscaling, load balancing, and inter-service communication.
- Automated application delivery and infrastructure provisioning via CI/CD pipelines on GitHub Actions and Terraform, making deployments repeatable, auditable, and reversible.
- Designed a disaster recovery strategy mirroring the AWS production environment on GCP using GKE, Cloud SQL, and Cloud Storage, with secure VPCs, IAM policies, and dual-environment CI/CD for rapid failover.
- Built a high-throughput background processing system handling 1M+ daily jobs across payments, messaging, and notifications using SQS/SNS, with multi-provider failover.
- Led performance optimizations that reduced peak request latency by 90% through Redis caching, query tuning, and indexing in PostgreSQL.
- Led a 12-person cross-functional team through full project lifecycle under Agile/Scrum: requirements, sprint planning, stakeholder management, and budgeting.

PROJECTS

Virk Cloud (virk.cloud)

Aug 2025 - Present

Founder & CTO

- Architected a multi-tenant Platform-as-a-Service for startups with built-in CI/CD, fixed billing, observability, real-time log streaming, and alerting - an internal developer platform pattern at commercial scale.
- Built the full management console in Next.js with authentication, user management, real-time monitoring dashboards, and billing.
- Manage the underlying infrastructure on virtual private servers: RKE2 cluster deployment, hardware/storage provisioning, network and traffic management, and DNS.

Stack: Kubernetes (RKE2), Terraform, FluxCD, Prometheus, Grafana, Next.js, Convex, Python

Digital-Recon: Transaction Reconciliation Engine

2025 - Present

Founder

- Building a real-time transaction reconciliation engine for financial institutions, detecting discrepancies across heterogeneous data sources including relational DBs, REST APIs, Elasticsearch, and Kafka topics.
- Architected an event-driven processing layer using Kafka for upstream transaction ingestion and Celery for scheduled and on-demand reconciliation jobs, including windowed scans, per-source reprocessing, and downstream alerting.

Stack: Kafka, Celery, Python, Elasticsearch, PostgreSQL, Docker, Next.js, TypeScript

AI Agents for Infrastructure Operations

2024 - Present

Personal R&D

- Building specialized AI agents for QA automation, code review, and sysadmin operations, running against live Linux production servers with real workloads.
- Prototyping agent-driven SaaS tools using RAG, tool-use, and multi-agent orchestration patterns.
- Completed AI Engineering Specialization (ByteByteAI) covering agents, RAG, and LLM application development.

EDUCATION

Ashesi University | BSc Computer Engineering | Sep 2016 - May 2020 | Berekuso, Ghana
